AMENDMENTS TO THE SPECIFICATIONIn the Abstract

Please substitute the following amended Abstract for the Abstract as currently pending (deleted matter is shown by strikethrough and added matter is shown by underlining):

~~The invention concerns a~~ A device for connection between previously intubed ends of a corporeal duct ~~[[ (12) ]]~~ and a substantially tubular prosthesis, ~~(10) characterized in that it consists of a sleeve (16) with~~ The device can be a meshed structure, such as a mesh sleeve, or the like that is deformable by means of a balloon catheter and capable of radial expansion between a stable configuration of minimum diameter and a final configuration after expansion that is likewise stable, said sleeve (16) comprising, at each end, a A series of teeth ~~[[ (22) ]]~~ for transfixing overlapping parts of the sleeve, uniformly aligned in a ring formation and radially oriented, can be found at each end of the mesh structure, said The teeth (22) having are of a hemostatic profile including a base part ~~[[ (32) ]]~~ with a circular cross-section extended by a trihedral terminal portion ~~[[ (34) ]]~~.
